

AT&T Resource Tracker

Follow the action on the field

Improve business efficiency, meet changing priorities, and enhance customer service – right from your smartphone.

AT&T Resource Tracker is a cost-effective mobile workforce tracking and dispatching solution. Using the AT&T Fleet Complete cloud-based application, dispatchers can send activities to mobile workers, based on geographical position and workload.

With the AT&T Resource Tracker app, the mobile worker can in turn, accept activities and update the dispatcher on the status of their activities in real-time.

- Lower business costs
- Complete crew visibility
- Increase efficiency
- Track mission-critical resources

Near real-time results

Keep track of your workforce no matter what the task at hand. Once you assign an activity to someone in your crew, the request is accepted by a team-member out on the road. They'll see the address and specific instructions that you can leave, ensuring the job is done right.

Easy to use interface

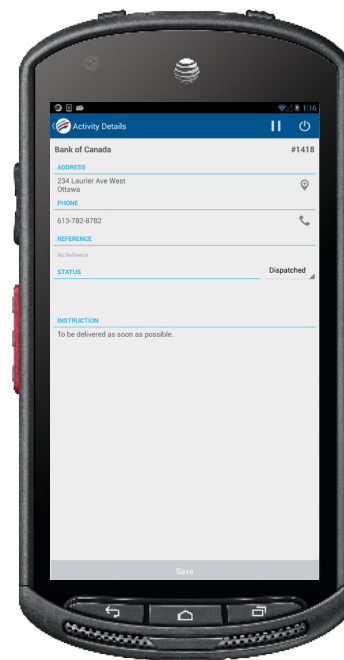

Have complete visibility over your team with the intuitive controls on the Booking Screen. View the calendar to overview specific times and dates, and customize how you track your resources – you can view activities by status, that means you can filter requests by status – Open, Dispatched, Accepted, or Rejected.

Comprehensive tracking map

Controlling your crew is now easier than ever with our helpful tracking screen. Jobs that are close to completion time, or that have been rejected (simply transfer to another resource), are flagged with an alert so you can take immediate action and stay on top of your resources.

Supported devices

Our AT&T Resource Tracker App can be easily downloaded from the iTunes or GooglePlay stores and installed on your devices. AT&T Resource Tracker runs on both Android and Apple smartphones and tablets.
